Quality, Environmental and Occupational Health and Safety Manual – SMS-006

Section A Scope or the Integrated Management System

To determine and establish the scope of the Integrated Management System (IMS) Your Company determined the boundaries and applicability of the quality, environmental, and health and safety systems and considered the external and internal issues, the requirements of the workers and other relevant interested parties, the activities, the processes, and the products and services that are within the company's control or influence and that can impact performance.

The scope is available and maintained as documented information stating the products and services covered by the IMS.

Scope of the Quality, Environmental and OHSMS.

Your Company applies all the requirements of ISO 9001:2015, ISO 14001:2015, and ISO 45001:2018 when they are applicable within the determined scope of the IMS.

As developed with procedure P-400 for Organizational context, include the scope of your IMS here: For example, if you are a manufacturer of toys, the scope manufacturer.

The scope of the Quality, Environmental and Health and Cafety Manuschent System includes the major product and service categories and science of with the trimary functions of manufacturing wooden toys at the North Pole cation and stributing source to children of all ages.

or be claimed if the requirements Conformity to the interest ional s plicab determined as not bein ct the organization's ability or responsibility to nt th meet requirements. In e e an equirement is not applicable at Your Company, equirement cannot be applied is documented. justificati for any ins Your Comp de mined that the following requirement(s) is/are not applicable to the

As determined with procedure P-400, identify the requirement(s) that do not apply and document the justification here: For example, if you are a manufacturer of toys, a requirement that does not apply may be:

Clause 8.5.5 for post-delivery activities does not apply to the company. Customer feedback has shown that conformity to post-delivery services is achieved with the initial delivery.

Date Approved
GUIDELINES FOR EMS OBJECTIVES AND TARGETS
DATA Form
A-620-001

Objectives can include commitments to:

- Reduce waste and the depletion of resources
- Reduce or eliminate the release of pollutants into the environment
- Design products to minimize their environmental impact in production, use and disposal
- Control the environmental impact of raw material sourcing
- Minimize any significant adverse environmental impact of new developments
- Promote environmental awareness among employees and the community.

Progress towards the objective targets can generally be medicated using environmental performance indicators such as:

- · Quantity of raw materials or energy used
- Quantity of emissions such a art dioxe, 2
- Waste produced per tity of ish product
- Efficiency of natival all entropy techniques
- Number of tarincidents (e.g. excursions above limits)
- Number of environmental accidents (e.g. unplanned releases)
- Percentage waste recycled
- Percentage recycled material used in packaging
- Number of vehicle kilometers per unit of production
- Specific pollutant quantities, e.g. NO, SO2, CO, HC, Pb, CFCS
- Investment in environmental protection
- Number of prosecutions
- Land area set aside for wildlife habitat.

An integrated Example:

Objective: Reduce energy required in manufacturing operations

Target: Achieve 10% reduction of the previous year

Indicator: Quantity of fuels and electricity per unit of production
